- **【Built-in 2-Coil Fast Charger】** With high-grade Qi Certification, this fast wireless charger is 1.6 times as fast as standard wireless chargers and can fully charge your device within 1.5-3 hours; built-in 2-coil inductive pad offers a wider charging area; no need to remove your phone case (less than 0.16") unless it's metal or has credit cards inside
- **【Multiple Safety Features】** The silent cooling fan with on/off button keeps the charger running at a low temperature to ensure the highest charging speed; overcurrent, overvoltage, overheating and short circuit protections keep you and your device safe
- **【Compatible Devices】** 10 W fast charging mode is supported by Samsung Galaxy S9 Plus, S9, S8 Plus, S8, S7, S7 Edge, S6 Edge Plus, Note 9, Note 8 and Note 5 (QC 2.0/3.0 adapter needed); 7.5 W fast charging mode is suitable for iPhone XS MAX, iPhone XR, iPhone XS, iPhone X, iPhone 8/8 Plus (5 V/2 A adapter needed); 5 W standard charging mode for all other Qi-enabled devices
- **【Sleep-Friendly Indicator Light】** Won't disturb you at night; green indicator light indicates the charging status; blue indicator light indicates the device is fully charged and the charger will automatically turn off after 5 seconds; when charging an iPhone X or iPhone 8/8 Plus, the indicator light will still stay green and continue to output a weak current, even if the device is fully charged
